AudioPlayer is a ready-to-run setup package for users who want to enjoy their media center multimedia in media center set up. The software is designed for all operating systems such as Windows 98, Windows 2000, Windows NT, Windows Me, Windows XP and Vista. The installation package is easy to use. An automatic program helps users to uninstall the program as well as to update the software without the help of technical experts. Besides, this program can run silently in the background. This allows users to use the computer without being annoyed with the unwanted sound effects. Features: AudioPlayer was designed to work with all the audio formats like MP3, WMA, OGG, AAC, FLAC, ALAC, AMR, WV, AU and M4A, and you will be able to use digital music files (such as music CDs) or captured sounds from the computer microphone. With AudioPlayer you can hear every secret of the computer's sound board as well as see the available audio devices. Moreover, you will be able to control the volume and mute function from the main interface. Program stability has been taken into account. Therefore, the user won't have problems adjusting the interface since the program will run smoothly on all the Windows computers. Pros: The easy-to-use interface allows users to configure the application without spending much time in searching for and navigating controls. AudioPlayer is offered in 32-bit and 64-bit versions, so you can download it for any operating system. Cons: The main drawback is the lack of support for the most modern OSs. AudioPlayer is very lightweight and slim. Therefore, it takes up just a very small amount of memory. In order to restart the computer, you will have to manually press a button to close the application. The program doesn't allow you to delete the entries displayed in the main window. AudioPlayer is available in three editions: Standard, Plus and MMC. How to install AudioPlayer: After downloading the setup package from our website, double-click the file named "AudioPlayerSetup.exe" to install it. Open Windows Explorer and select "C:\AudioPlayer" to access the audio player's folder. You will have to move the *.exe file into that folder. Double-click the extension to run the program as a default program. If you can't delete the settings from the main window, select the "Delete All" button. AudioPlayer offers a
