## Mgosoft PDF Stamp SDK For Windows

◆ It enables you to create applications that can apply watermarks, consisting of image, text and graphic lines, to scanned or typed documents. ◆ The product contains libraries for multiple programming languages and supports multiple picture formats: JPEG, GIF, TIF, TIFF, PNG and BMP. ◆ The demo programs demonstrate the capabilities of the component. About the Author: Mgosoft PDF Stamp SDK is an innovative software component intended to be used by developers, and it enables you to integrate PDF stamping functions into your applications. With the help of this development kit, you can build programs that have the ability to apply watermarks consisting of images, text or graphic lines, making it possible to personalize documents or prevent them from being stolen. Of course, the complexity of the created application depends on the type of project you have in mind, but Mgosoft PDF Stamp SDK enables you to integrate several useful customization options and supports multiple image formats. For instance, it is possible to customize the position and appearance of the watermarks, process only specific page ranges and insert various dynamic elements, such as the current date or time, page numbers, file names and so on. When applying image-based watermarks, multiple popular picture formats are supported, including JPEG, GIF, TIF, TIFF, PNG and BMP. The downloadable package includes libraries for multiple programming languages, including C#, C++, Visual Basic and VB.NET. Because of this, the development kit can help you create applications for a wide range of platforms. Also provided are sample programs that allow you to test the capabilities of the component and get a good idea of what can be achieved with its help. Naturally, they are not particularly complex, but they are merely designed to demonstrate the capabilities of the included libraries. Developers can consult the bundled user manual to ensure they get started on the right track. It explains how the component can be integrated into your application and lists all the supported parameters. If you don't want to lose any of your educational data, don't forget to backup your educational certificates. It is very important to backup your certificates before you migrate. A system failure could cost you a lot of money - big time! You can also backup your certificates automatically or manually, depending on your preference. Why you need to backup your educational certificates? The good news is that you do not have to back up your certificates manually.

Naturally, they are not particularly complex, but they are merely designed to demonstrate the capabilities of the included libraries. Developers can consult the bundled user manual to ensure they get started on the right track. It explains how the component can be integrated into your application and lists all the supported parameters. List of features and specifications : Simplicity No pre-requisites. No external dependencies. Simple installation. No external setup. Single binary for all platforms. Integrated SDK. No separate DLL or EXE files needed. Compile-time support for Visual Studio 2010 and Visual Studio 2008. 64-bit application with additional library support for Visual Studio 2015 and Visual Studio 2012. Compatibility with code written for Windows, Android, iPhone, Symbian, etc. Image formats: - JPG/JPEG/PNG/BMP/GIF/TIFF File encrypting: - SHA1/MD5 algorithm Password setting: - SHA1/MD5 algorithm PDF Support: - Adding & Modifying text, image or line in PDF document. - Adding watermark image in PDF document

### What's New In Mgosoft PDF Stamp SDK?

Mgosoft PDF Stamp SDK is a software component intended to be used by developers, and it enables you to integrate PDF stamping functions into your applications. With the help of this development kit, you can build programs that have the ability to apply watermarks consisting of images, text or graphic lines, making it possible to personalize documents or prevent them from being stolen. Of course, the complexity of the created application depends on the type of project you have in mind, but Mgosoft PDF Stamp SDK enables you to integrate several useful customization options and supports multiple image formats. For instance, it is possible to customize the position and appearance of the watermarks, process only specific page ranges and insert various dynamic elements, such as the current date or time, page numbers, file names and so on. When applying image-based watermarks, multiple popular picture formats are supported, including JPEG, GIF, TIF, TIFF, PNG and BMP. The downloadable package includes libraries for multiple programming languages, including C#, C++, Visual Basic and VB.NET. Because of this, the development kit can help you create applications for a wide range of platforms. Also provided are sample programs that allow you to test the capabilities of the component and get a good idea of what can be achieved with its help. Naturally, they are not particularly complex, but they are merely designed to demonstrate the capabilities of the included libraries. Developers can consult the bundled user manual to ensure they get started on the right track. It explains how the component can be integrated into your application and lists all the supported parameters. Mgosoft PDF Stamp SDK Description: Easily create PDF stampers with Mgosoft PDF Stamp SDK By embedding the Mgosoft PDF Stamp SDK component in your application, you can create document personalization modules that enable users to stamp watermarked pages. You can add text watermarks, image watermarks or even graphic line watermarks to a PDF file. Mgosoft PDF Stamp SDK is designed to integrate PDF documents with external sources and processes. You can use it to: • display watermarks on specific pages • save documents and the associated watermarks on a specified date, time, file name and so on • modify metadata, including title, subject, creator, author, version and so on • prevent the PDF file from being read or copied • add titles, descriptions, keywords and custom metadata to the PDF file

## System Requirements For Mgosoft PDF Stamp SDK:

Minimum: OS: Windows XP Service Pack 2, Vista, Windows 7, or Windows 8 Processor: Dual core processor 2.4 GHz or faster Memory: 4 GB RAM Graphics: 32-bit DirectX 9.0c compatible video card DirectX: Version 9.0c Hard Drive: 17 GB available space Sound: DirectX 9.0c compatible sound card Additional Notes: The author of this project is not responsible for any damage or loss caused by
