We also carry inexpensive tobacco for your pipe and cigar enjoyment, as well as a great variety of fine tobaccos and pipe tobaccos for the connoisseur.Q: Get index of end of text from line I need a function that takes a line of text and returns the index of the end of the text. The text can be of any length, so using line.index('.') isn't the solution, nor is line.rindex('.') etc. For example, I've got the following text: a b c a b c a b c d e f d e f d e f d e f And I want to get the index of the 'a' in the third line, i.e. 4. How can this be achieved? A: You can use Python's str.rfind() function: >>> my\_text = 'a b c a b c a b c d e f d e f d e f ' >>> my\_text.rfind('a')
